## Demographic Indicators

### Summary

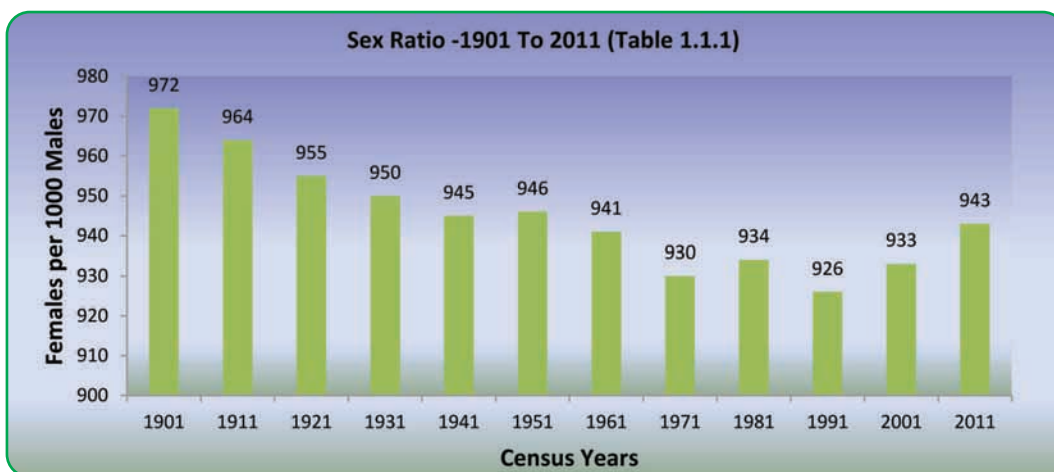

Demographic characteristics of a country provides an overview of its population size, composition, territorial distribution, changes therein and the components of changes such as nativity, mortality and social mobility. This section on demographic indicators has been subdivided into two parts- Population Statistics and Vital Statistics. Population statistics include indicators that measure the population size, sex ratio, density and dependency ratio while vital statistics include indicators such as birth rate, death rate, and natural growth rate, life expectancy at birth, mortality and fertility rates. These indicators for the country as well as states will help in identifying areas that need policy and programmed interventions, setting near and far-term goals, and deciding priorities, besides understanding them in an integrated structure. Data in this section has been taken mainly from the “Census of India”.

- India's population, as per census 2011 stood at 12105.7 lakhs (6231.2 lakhs males and 5874.5 lakhs females). Out of the entire census till date, the Average Annual Exponential Growth Rate has been negative only for the decade 1911-21. During this interval, population declined marginally due to great influenza epidemic and two successive bad harvests in West Bengal. [Table No. 1.1.1]

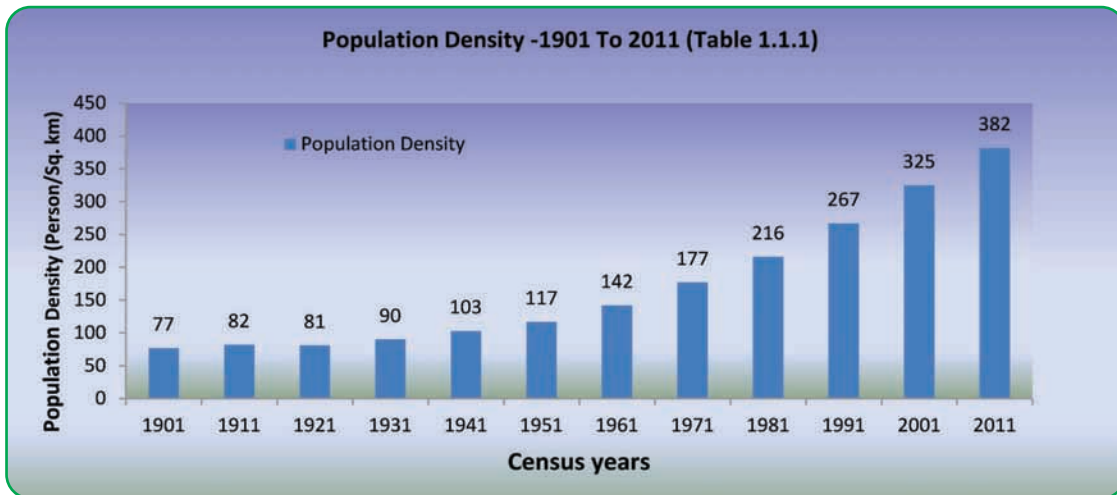

Source: Registrar General of India.

- The country has a low sex ratio of 943 females per thousand males, which has shown slight improvement during the last decade. [Table No. 1.1.1] Among the states, the sex ratio is least for Haryana while among the UTs, Daman & Diu lags behind. Kerala tops the list with maximum sex ratio. [Table No- 1.1.4]

- The population density of India in 2011 was 382 per sq km while urban population was 31.15 % of the total population. There has been 12% increase in the urban population over the last decade, whereas, over-all population density has increased by 17%. Delhi has highest population density while Arunachal Pradesh has lowest population density. India accounts for a meagre 2.4 percent of the total world surface area of 1357.9 lakhs sq km [Table No. 1.1.1].

- Age distribution of the population shows 30.9% in 0-14 age group while only 7.5% are in 60+age group. [Table No. 1.1.5]

Source: Registrar General of India

- The Estimated birth rate declined from 25.8 in 2000 to 21.8 in 2011 while the death rate declined from 8.5 to 7.1 per 1000 population over the same period. The natural growth rate declined from 17.3 in 2000 to 14.7 in 2011 as per the latest available information. [Table No. 1.2.1]
- The population, however, continues to grow, as the decline in the birth rate is not as rapid as the decline in the death rate.

- Infant Mortality Rate has declined considerably (44 i.e. Per 1000 Live Births in 2011), however differentials of rural (48) & urban (29) are still high. [Table No. 1.2.8]

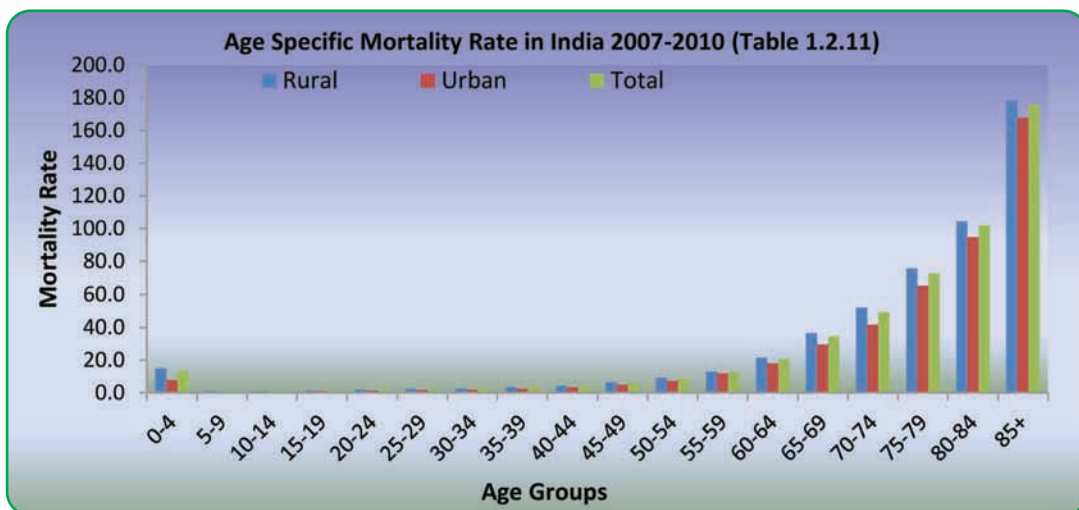

Source: SRS Bulletin – December, 2011, Registrar General of India

Source: Special bulletin on maternal mortality, June 2011, Office of the Registrar General,

- As per the latest data available, maternal mortality ratio is highest in Assam & lowest in Kerala. [Table No-1.2.9]
- The Age-specific Mortality rates are declining over the years, the rural-urban differentials are still high. [Table No. 1.2.11]

Source: Statistical Report -2010 Registrar General of India

- The Total Fertility Rate (TFR) for the country was 2.5 whereas in rural areas it has been 2.8 and it has been 1.9 in urban areas during 2010 as per the latest available information. [Table No. 1.2.12]

#### Notes:

- a The distribution of population by sex of Puducherry for 1901 (2,46,354), 1931 (2,58,628) & 1941 (2,85,011) is not available. The figures of these years are therefore, exclusive of these population so far distribution of sex is concerned.
- b Sexwise Distribution of Chandan Nagar (26831) of West Bengal and Gonda (18810) of Uttar Pradesh are not available.
- c Includes interpolated population of Assam where the 1981 census could not be conducted owing to disturbed conditions prevailing in that state during that period.
- d Includes Interpolated population of Jammu & Kashmir based on final population of 2001 census, where the 1991 census could not be held.
- e India figures for 2001 & 2011 census are final and exclude those of the three sub-divisions Viz. Mao Maram, Paomata and Purul of Senapati district of Manipur as census results of 2001 in these three sub-divisions were cancelled due to technical and administrative reasons.
- f Excludes Puducherry
- g In working out 'decadal growth' and 'percentage decadal growth' for India 1941-51 and 1951-61 the population of Tuensang district for 1951 (7,025) and the population of Tuensang (83,501) and Mon (5,774) districts for 1961 census of Nagaland state have not been taken into account as the areas were censused for the first time in 1951 and the same are not comparable.
- h For calculating density, the area figure for India exclude 78,114 sq. Km. under illegal occupation of Pakistan and 5180 sq. Km. illegally handed over by Pakistan to China and 37555 sq. Km. under illegal occupation of China in Ladakh district and 1573 sq. Km. of three sub-division of Senapati district of Manipur due to above mentioned reason.

### General Notes

- The figures for India and Manipur, include by sex, the estimated population, 0-6 population and literates of Paomata, Mao Maram and Purul sub-divisions of Senapati district of Manipur for Census 2001 and 2011.
- For working out density of India and the State of Jammu & Kashmir, the entire area and population of those portions of Jammu & Kashmir which are under illegal occupation of Pakistan and China have not been taken into account.
- For Census 2011, the population of "Others" has been clubbed with the "Males" for working out population, 0-6 population, literates and relates rates and ratios.
- In working out 'decadal variation' and percentage decal variation' for 1941-1951 & 1951-1961 of India and Nagaland State, the population of Tuensang District for 1951(7.025) & the population of Tuensang (83,501) & Mon (50,774) districts for 1961 Census have not been taken into account as the area was censused for the first time in 1951 and the same are not comparable.
- The 1981 Census could not be held owing to disturbed conditions prevailing in Assam. Hence the population figures for 1981 of Assam have been worked out by 'Interpolation'.
- The 1991 Census was not held in Jammu & Kashmir. Hence the population figures for 1991 of Jammu & Kashmir have been worked out by 'Interpolation'.
- The distribution of population of Pondicherry (Puducherry) by sex for 1901 (246,354), and 1931 (258,628) and 1941 (285,011) is not available. The figures of India for these years are, therefore, exclusive of these population figures so far as distribution by sex is concerned.
- Arunachal Pradesh was censused for the first time in 1961.
- In 1951, Tuensang was censused for the first time in 129.5 sq. kms of areas only. In 1961 censused areas of Tuensang District of Nagaland was increased to 5356.1 sq. kms.
- Due to non-availability of census data the figures for the decades, from 1901 to 1951 have been estimated for the districts of Kohima, Phek, Wokha, Zunheboto and Mokokchung of Nagaland. Estimation however could not be done for Tuensang and Mon as they were not fully censused prior to 1961.
- As the sex break-up for the districts Sheopur, Morena, Bhind, Gwalior, Datia, Shivpuri, Guna, Ratlam, Ujjain, Shajapur, Dewas, Jhabua, Dhar, Indore, West Nimar (Khargone), Barwani, Raigarh, Bhopal, Sehore and Raisen is not available for the year 1901. Figures for males and females have been estimated for the year 1901 for Madhya Pradesh
- One village Ramtapur (code No. 217 and 101 in 1951 and 1961 respectively) of Jukkal circle of Degulur taluka which was transferred under the state Recognition Act, 1956 from Maharashtra to Andhra Pradesh, till continues in Nanded district of Maharashtra. The population of this village has, however, been adjusted in Nizamabad district for the year 1901-1951.
- The names of Uttranchal and Pondicherry have changed to Uttarakhand and Puducherry respectively after Census 2001.

Source: Report on Medically Certified Cause of Death for the Year 2007, Office of Registrar General of India

It is hereby stated that the Report is based on Medically Certified Deaths occurring in hospitals (whether public or private) covered under the Scheme of MCCD run by Office of RGI. As only selected hospitals, and that too mostly from urban areas, are covered at present under the scheme of MCCD, the profile presented here may not yield the reliable pattern of cause specific mortality prevalent in the States/Country in the strict sense of the term. However, it gives a valuable insight into the broad pattern of Cause-specific Mortality in the country. Keeping this in view, the data- users may take due caution while deducing the mortality pattern.
